

Failure Free READING™

Software with Internet Connection

Minimum System Requirements for PC/Windows and Macintosh:

The Failure Free Reading Online program requires a computer with the following specifications:

- Windows XP, Windows Vista, Windows 7, Mac OS 8.1+
- High Speed Internet Connection
- Internet Explorer 5+, Netscape 4.7, Firefox 6+, or Safari 2.0
- An Updated Version of Adobe Flash: Free Download at www.flash.com

Software without Internet Connection

Minimum System Requirements for PC/Windows:

The Failure Free Reading program requires a **PC/Windows, Pentium III or higher, multimedia computer** with the following specifications:

- At least 800 x 600 color monitor set to at least 16-bit or Thousands of Colors
- Standard keyboard and mouse
- 64 megabytes of physical memory (RAM)
- CD-ROM Drive (required for installation only)
- A SoundBlaster Audio Card (or 100% SoundBlaster Compatible Audio Card)
- Windows 98 or greater
- QuickTime 5 (Installer Provided with Program)
- Note: for Network installations, the program is Novell and Windows NT/2000 compatible.

Software without Internet Connection

Minimum System Requirements for Macintosh:

The Failure Free Reading program requires a **PowerPC or greater MAC (including G3, G4, iMac)** with the following specifications:

- At least 800 x 600 color monitor set to at least Thousands of Colors
- Standard Macintosh keyboard and mouse
- 64 megabytes of physical memory (RAM) free and available for this program
- CD-ROM Drive (required for installation only)
- System Software 9.1 or greater (Note: use of earlier system software to run the programs will cause unpredictable results and is not supported)
- QuickTime 5 (Installer Provided with Program)
- Note: for Network installations, the program is AppleShare and Windows NT/2000 compatible (excluding AppleShare IP 5.x)
